Summary

When the COVID-19 pandemic began, I saw an opportunity to learn something new. With a lifelong interest in technology, I dove deep into the world of programming and haven't stopped learning and creating awesome projects since. After 3 years, I have gained proficiency in HTML, CSS, JavaScript, React, TypeScript, and SCSS, and have utilized these technologies to design visually pleasing and user-friendly websites and web applications.

My most recent project is a full-stack web application(joblyapp.net) that manages and organizes all aspects of the job search, making life easier for job seekers. It is built with React, TypeScript, SCSS, Firebase, and follows best coding practices. Passionate about creating things that provide value and solve real-world problems, I am always seeking new challenges and opportunities to learn.

Experience

Jobly(joblyapp.net)
📅 January 2023 - March 2023

Designer & Front-End Developer
HTML | SCSS | TypeScript | React | Next.js | Firebase

- Jobly is a web application to manage and organize all aspects of job search, including job postings, interviews, and notes, making life easier for job seekers.
- Designed the whole application with a focus on user experience.
- I utilized HTML/SCSS, TypeScript, React and Next.js to develop the front-end of the web application, ensuring that it was optimized for performance and responsiveness.

[Code]

BeBetter(bebetter.chat)
📅 December 2022 - January 2023

Designer & Front-End Developer
HTML | SCSS | JavaScript | React

- BeBetter is an AI-powered chatbot that uses the most advanced NLP model available. That enables it to understand and respond to users' needs and give personalized advice on any topic.
- Designed the whole application with a focus on user experience.
- Developing the front-end, I utilized HTML/SCSS, JavaScript, and React to ensure that the final product was visually appealing and user-friendly.

[Code]

AssetNet(assetnet.co)
📅 December 2022 - January 2023

Designer & Front-End Developer
HTML | SCSS | JavaScript | React

- AssetNet is a web application that presents the latest data on users' selected assets in a customizable and easily accessible interface
- Designed the whole application with a focus on user experience.
- In creation of the front-end, I employed HTML/SCSS, JavaScript, and React, making the web application pixel-perfect.
